

Dr. Burgess Weekly Video Address October 11, 2014
“Ebola Field Hearing”

Hello, this is your Congressman, Michael Burgess. I’m here today at the Dallas/Fort Worth Airport at the conference center where we just completed a field hearing on the effects of the Ebola virus in this country.

We all know the Ebola virus has extracted a very large human toll in Western Africa and over the last couple weeks we’ve seen the toll it has taken here in our backyard in the Metroplex.

Certainly, there are things that are in process that I would say are encouraging, as far as screening and prevention from many other individuals with the virus making it through our customs and border facilities, but there is still a long way to go.

The hearing today was a good first step in that direction. There will be additional hearings coming up next week in Washington, but as always, I appreciate hearing from you on this area and feel free to contact my office with your concerns or your questions.

This is Michael Burgess, coming to you from Dallas/Fort Worth Airport. May God bless our country and may God bless Texas. Thank you.
